mini Sprint MK II

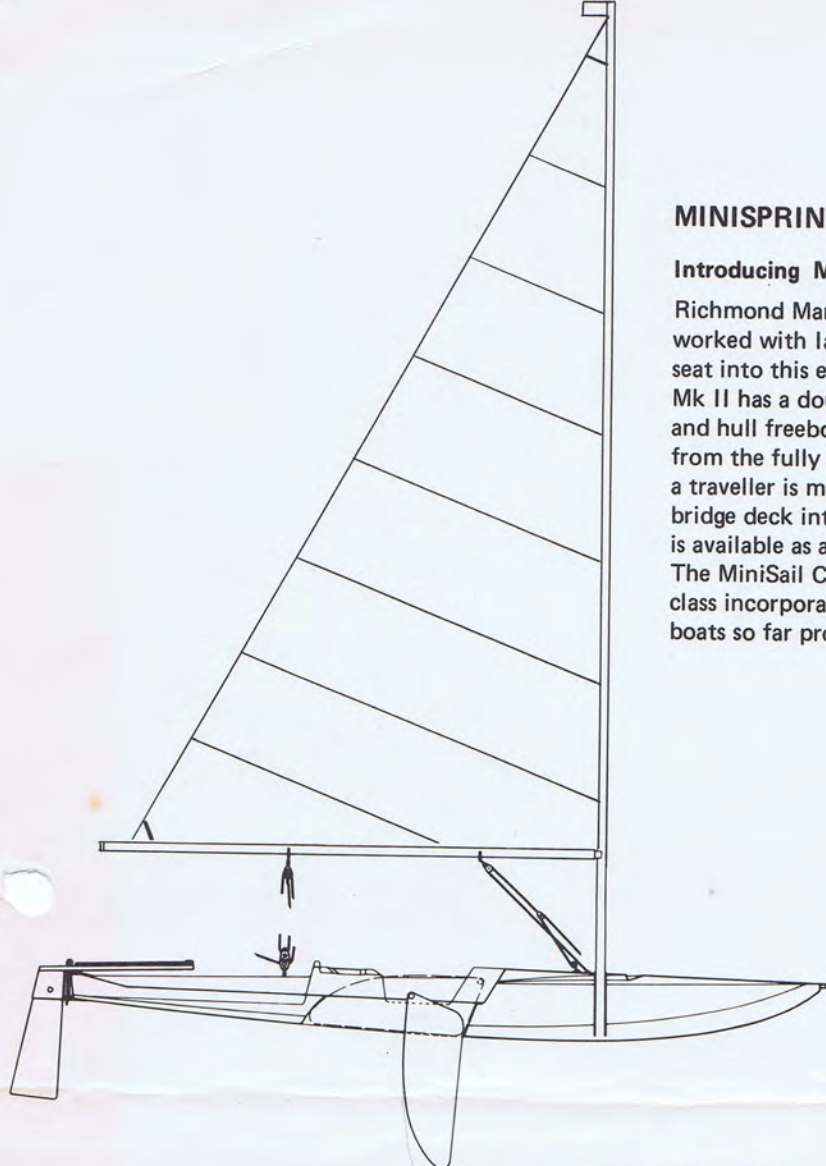

There is real sailing excitement with the MiniSprint mkII.
This is a true "Sports Car" of sailing. She is a quality, high performance craft that features
a swing centerboard, lightweight hiking bench and an 80 sq. ft. sail.
This coupled with an open transom for rapid self-draining, excites the true sailor.

Hiking-power, enables the average sailor to handle fresh breezes
including the ability to plane to windward.

MINISPRINT MK II

Introducing MiniSprint Mark II

Richmond Marine Limited and the MiniSail Class Association have worked with Ian Proctor to incorporate a centreplate and sliding seat into this exciting singlehanded class dinghy. The MiniSprint Mk II has a double floor with open transom for rapid self-draining and hull freeboard has been raised for sea conditions. Power output from the fully adjustable rig with stiff main boom centre sheeted to a traveller is matched by that from a lightweight seat sliding on a bridge deck integral with the deck moulding. This new 'SPRINT' is available as a hull only for home or professional completion. The MiniSail Class Association is a rapidly expanding semi-development class incorporating a number of different concepts amongst the 6000 boats so far produced with which the MiniSprint MK II will now race.

Weight	49.90 Kg. min	110 lbs. min.
Hull Colour		Ivory
Deck Colour		Dark Blue
Sail Area	7.43 sq. mtrs. max.	80 sq. ft. max.
Sail Colour		White
Spars		Black anodised

Specifications are subject to alteration without prior notice

The **MiniSail** designed by Ian Proctor, M.S.I.A. for Richmond Marine Ltd., has won the silver medal at a Milan Triennale and has been selected for design display in twenty different countries. She's a real eye stopper but so simple to handle with the sail partially furled around the mast, a beginner can sail her. She's safe, too-unsinkable, and with internal foam flotation. If you are pressed for time you can get home from work and sail your MiniSail that evening – takes ten minutes to rig her and you're out sailing! No maintenance of the glassfibre hull or gold anodised aluminium spars – just wash the sail out once a year.

The MiniSail comes complete and ready to sail. You have a choice of deck and sail colour and these can be mixed or matched as required.

For the experienced helm, sailing single handed in a force 4, a sliding seat can be a great help. This is supplied complete as an optional accessory and is kept in place by simple clamps which fit under the deck flange.

We can supply you with an adjustable dinghy roof rack which fits almost any make of car.

Specification

Length	13'
Beam	3' 8"
Hull material	Glassfibre moulding
Hull colours	White
Deck colours	Orange or blue
Sail Material	Man-made fibre
Sail Area	80 sq. ft.
Sail colours	White with red or orange stripes.
Mast	19' 6" overall, two-piece gold anodised aluminium alloy tube with fishing rod joint, unstayed.
Boom	9' 1" overall, one-piece anodised aluminium alloy tube.
Fittings	White ICI Kemetal and Maranyl injection moulded plastic, and stainless steel.
Registered Design Numbers	904668, 899761, 929371

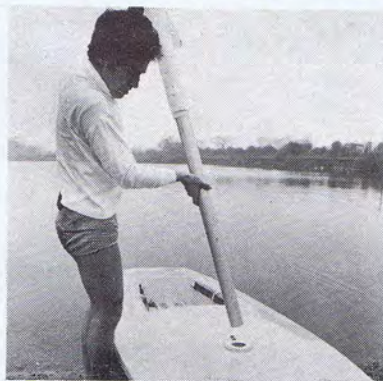

Carries on any car Light to lift Simple to rig Ready in minutes

1. Stern first, right way up, held down by the mainsheet with the spars alongside, on either a luggage rack or Richmond Marine's special two bar adjustable dinghy carrier.

2. At 85 lbs hull weight the MiniSail is simple for a man and a girl to get on or off the roof of a car and is light enough to be carried single handed down the beach.

3. Join together the mast, slide it into the sleeve in the luff of the sail and rotate the sail round the mast. Slip the burgee into the pocket in the top of the sail. At the water's edge step the mast and unlash the sail. Clip the clew to the boom and tie the tack line.

4. There are no shackles, no halliards, no wire rigging or bottle screws in the MiniSail. Once the sail is up just attach the mainsheet and kicking strap, instal the rudder and dagger board and your MiniSail is ready to sail.

MiniSprint Mk II – unisex singlehander

For sheer down wind performance in a blow this may be the boat for you? Agility to work a 5'6" sliding seat and panache to venture forth when the white horses are running are the measures for her crew. Designed by Ian Proctor the Sprint conforms to the MiniSail Class Association rules and races within the 7000 strong MiniSail fleet. MiniSprint Mk II adds to the planing ability of the MiniSail the ease of handling afforded by a pivoting centreplate (neat for launching off a beach and for shoal water sailing too) and the increased power output of a fully adjustable rig with stiff main boom. An open transom sheds the spray and any waves dunked into the cockpit during rough-water launching

Let 1000 ideas flourish! MiniSail is a semi-development racing class and the new Sprint is therefore available as a hull shell only with or without rig for plywood home decking and completion. As a low cost vehicle for your tuning ideas, a self built MiniSprint Mk II could be very hard to beat!

Boys (and girls) not seperated from the men! Mrs. Linda Ingram frequent MiniSail National Champion and ex British Ladies Champion has repeatedly shown that, even in a breeze, the weaker sex can prove the stronger competition. Whilst MiniSprint's ample displacement appears tolerant of a wide range of crew weight, it's sliding seat provides the muscle light weights need to stay with it in a wind

SPECIFICATION:

length	3.96 mtrs	13' 0"
beam	1.16 mtrs	3' 8"
weight	49.90 kg min	GRP hull only ex-fittings 110 lbs min
hull colour		white
deck colour		green
sail area	7.43 sq mtrs max	80 sq ft max

Fast, safe, simple MiniSail is the go-anywhere sailboat. Whether you spend weekends on the beach, or can only snatch a few hours sailing, take a MiniSail. It's the one space-age design amongst sailing boats. Ian Proctor created it to make family sailing possible, with little trouble, a lot of fun, at an incredibly low cost. Look at the hull-55 Kg. of super polished fibreglass, steel strong to take years of use but light enough for one person to lift. Rides on your Mini easily. Look at the rig! In 3 minutes you're ready to sail. Halliards, shackles, and all that yachting jazz. None! While other sailors are still wielding marlin spikes, tying reef knots, you and your MiniSail will be off with the wind, surfing the combers! *Off duty*, MiniSail needs no special berth-keep it at home-it's a cinch to load onto your roof rack

Anywhere, everywhere, MiniSail is a certain eye-catcher. MiniSail looks good, feels good to sail. Whether riding the crests at 14 knots under full sail, or nursing a beginner through the first tentative sailing steps, with the sail reefed round the mast. MiniSail's Ian Proctor pedigree pays off. Children can handle her, mothers trust in her-MiniSail's a family boat all the way

Richmond Marine also manufacture the race-tuned MiniSprint a fast single hander. *Ask for details*

MINISAIL SPECIFICATION :

Length	3.96 M (13 feet)
Beam	1.11 M (3 feet 8 inches)

The Mini Sprint Mark II is built with double skinned hand laid fiberglass. The mast and boom are black anodized aluminum.

The fittings are stainless steel and nylon. The rudder and centerboard are multi-core birch plywood, sealed with marine plywood for strength and durability. Positive buoyancy is assured by polystyrene blocks in the hull.
