

Winisisai

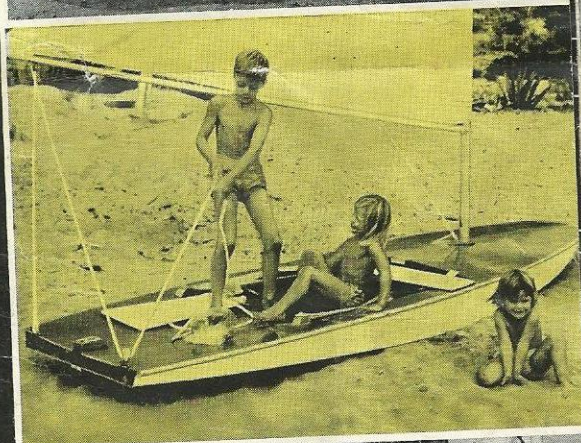

Simple to store
With a hull depth of 12 inches, your Minisail is easily slung under the garage roof. Ready to go? Just lower it on to the roof-rack of your car

Simple to transport
Minisail will ride happily on a standard roof-rack on any car, and the two piece aluminium mast lies neatly beside the hull

Simple to rig
Once at the water, your Minisail is easily carried by two people. With its simple rig – only two knots to tie – you are soon afloat

Simple to sail
Its single sail, and well-planned layout, make the Minisail very easy to handle. Why not start a fleet in your area?

made for your pleasure

SPRITE

The MiniSail satisfies the need for a roof-rack craft that is easy to sail, excitingly fast, completely unsinkable — and really low priced. Exceptionally light to lift and portable on the smallest car, this 13-ft. dinghy designed by Ian Proctor comfortably carries two adults even in rough waters. Under 80 sq. ft. of sail it reaches speeds *up to 14 knots* off the wind and its Bermuda rig ensures full windward efficiency. Getting afloat takes literally seconds; the mast is slipped into the sail sleeve and stepped into the boat. Its unbattened sail can be quickly reefed or furled by rotating the mast. Being fully buoyant, the MiniSail cannot be swamped. Its simplicity, safety and stability make it ideal for beginners and children. The MiniSail comes in two versions . . . the Sprite and Monaco. The Sprite in top-quality marine ply gives you higher speeds at lower cost than any other sailboat. Add a new dimension to family weekends at the beach and holidays abroad with a MiniSail Sprite. *Price complete with Terylene sail and aluminium spars: Mark I, Standard 79 gns.; De Luxe (including telescopic reefing boom, Terylene rope and racing burgee) 84 gns. Mark II (with self-draining cockpit), Standard 89 gns.; De Luxe 94 gns.; Racing seat 6 gns. H.P. terms available. Regd. Design No. 904668.*

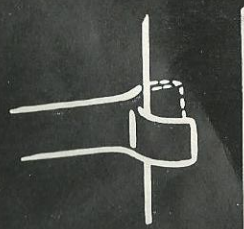

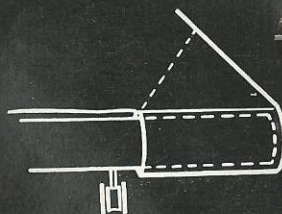

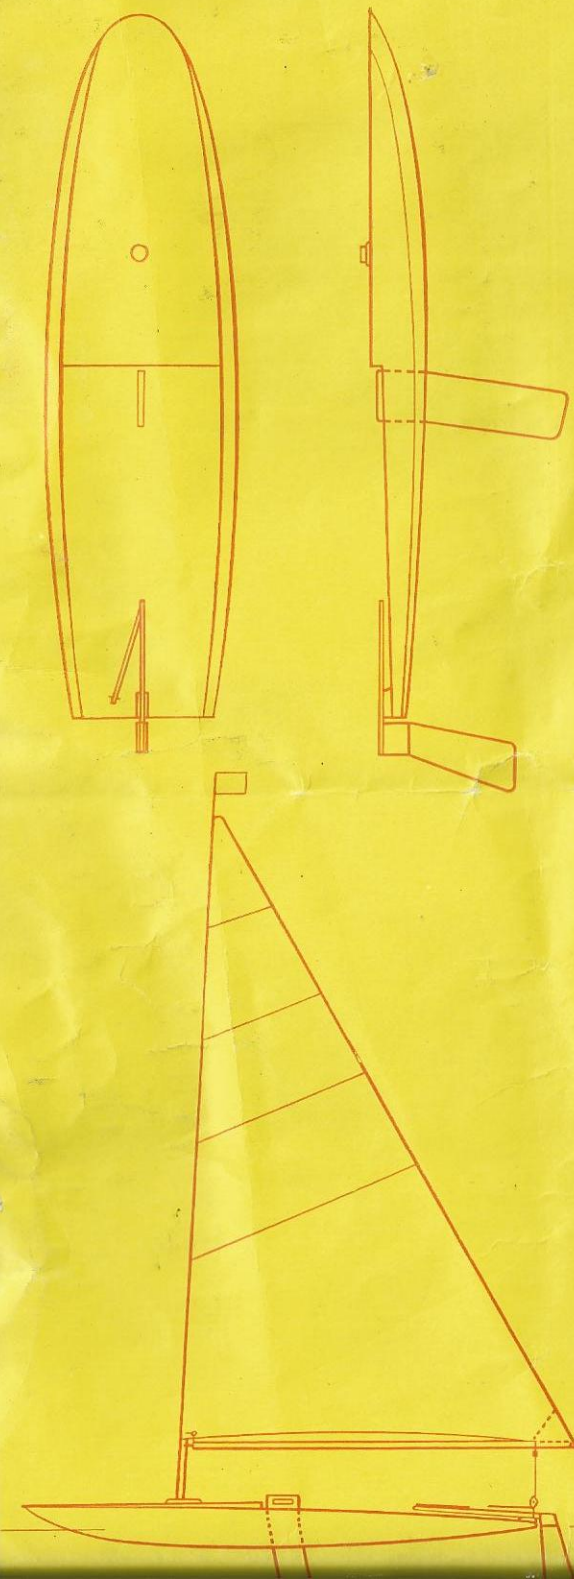

... and your excitement

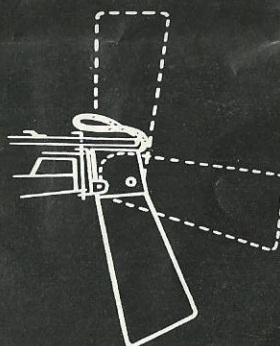

MONACO

The Monaco sets new standards in fibreglass construction and in superb good looks. Its brilliant design won a silver medal at the 1964 Milan Triennale and it has represented Britain in 14 international design exhibitions. Both hull and deck are in gleaming fibreglass edge bonded for perfect watertightness; this unit structure with built-in mast socket, daggerboard case and buoyancy is ultra light and strong. Its sleek lines promise outstanding all-weather performance. For the expert the added power of a racing seat makes the Monaco spectacularly fast for club races. For busy people or for fleet ownership tough age-resisting fibreglass spells complete freedom from maintenance — never needs painting and weathers any climate. Enjoy the luxury of carefree sport with a MiniSail Monaco. Join the hundreds of MiniSail owners and their active class association. *Price complete with Terylene sail and aluminium spars: Standard (all white) 99 gns.; De Luxe (including coloured deck, telescopic reefing boom, Terylene rope and racing burgee) 112 gns.; Racing seat 6 gns. H.P. terms available. Regd. Design No. 899761.*
